

ResolveDesk AI — Privacy Policy

Data Protection & Privacy Rules

Compliance Scope

ResolveDesk AI is fully compliant with GDPR (General Data Protection Regulation) and CCPA (California Consumer Privacy Act) standards to ensure user safety and rights control.

PII Protection & Encryption

All personally identifiable information (PII) including email addresses, phone numbers, and names is encrypted in transit using TLS 1.3 and at rest using AES-256 encryption. We enforce automated redaction scripts to clear PII logs before exposing metrics to third-party dashboards.

Data Retention

Workspace data, board histories, and checklists are retained until user account deletion. Deleted workspace accounts have their data completely scrubbed from active storage databases within 30 days of deletion approval.

Subprocessors and GDPR Rights Process details

Authorized Third-Party Subprocessors

ResolveDesk utilizes standard infrastructure providers to operate the software. This includes Amazon Web Services for database storage, Qdrant Cloud for vector index search services, and Stripe for billing and card transaction processing. Each subprocessor is audited annually to ensure safety.

Submitting a GDPR Data Erasure Request

Under GDPR regulations, users have the right to request deletion of all personal history details. Submit requests to privacy@resolvedesk.ai. Our team will verify credentials, fetch database records matching your email ID, and scrub all traces within 30 days.
